Western University
KIN 1080 Introduction to Psychomotor Behaviour
Winter 2018

Course instructor: Dr. Matthew Heath
Office: Somerville House 2369
Email: mheath2@uwo.ca
Office Hours: Wednesday TBA
Additionally times can be scheduled, please do not hesitate to ask
Laboratory Instructors: TBA

Course Information:

Course Number/Name: KIN 1080b, Introduction to Psycho-Motor Behaviour
Course Meeting Information: Monday, Wednesday, Friday: 8:30 am – 9:20 am
Health Sciences Building, 040
Course Website: <https://owl.uwo.ca/>

Calendar Course Description

Fundamental concepts and theories related to movement learning and control will be introduced. The material will address many of the factors that affect the production of motor behaviour. Students will learn about the basis for movement skill and variables that can be used to improve level of skill.

My Course Description:

Fundamental concepts and theories related to the movement neuroscience will be introduced. The material will address the factors that affect the production of motor behaviour. Students will learn about structures of the central nervous system that relate to skilled movement.

Learning Objectives:

- i. To introduce students to the structure and function of the central and peripheral nervous systems: emphasis placed on relevant motor system structures.
- ii. To understand the relevant issues associated with the measurement and evaluation of human motor behaviour.
- iii. To understand the cognitive- and sensorimotor factors influencing purposeful movement.
- iv. Define the sensory systems associated with the regulation of skilled purposeful (e.g., vision, proprioception).
- v. To understand the neuromuscular factors influencing skilled purposeful movement.
- vi. To acquaint students with scientific writing techniques, including the need to write succinctly yet comprehensively.

Assistance with Class Material

1. **The preferred means for students to get assistance with course material, labs, or procedural requirements is to ask questions during lectures.** *Remember, it is unlikely that you are the only one with the question/problem.*
2. A second option is to ask the course instructor or lab instructors during office hours, or before or after class. **It is also possible to contact the course instructor via email; however, the sheer number of students in this course may not allow for a timely response.**
3. Note: it is the student's responsibility to obtain ancillary lecture notes/materials when they have missed a class (i.e., students must get this information from a colleague in the
