

**Learning Outcomes/Schedule:**

The goal of this course is to examine the physiological changes with advanced age, with attention to the relationship to physical activity, disuse and disease. Upon completion of this course, students will be able to:

- Compare and contrast the theories and biomarkers of aging
- Understand the psychological changes associated with aging, and explain relationships among changes in different physiological systems
- Describe the impact of physiological changes on cognitive and physical function
- Compare and contrast the role of disease, disuse and physical activity in altering the physiological changes with advanced age
- Articulate strategies to promote healthy aging
