<b>POLICY:</b> <b>FALL PROTECTION</b>	<b>NUMBER:</b> WP-44
	<b>Page 1 of 2</b>

**PROCEDURES:**

1. Where possible, attempts will be made to remove the risk of falling by use of barriers, guardrails, safety nets or altering the work procedure so as to eliminate the need to encroach an unprotected edge as defined above.
2. Where it is not possible to eliminate the risks outlined above, travel restraint options as defined above will be investigated and utilized where appropriate.
3. Where travel restraint options are not appropriate or feasible, fall arrest systems will be employed as defined above.

**EQUIPMENT:**

All travel restraint and fall arrest equipment must be CSA approved, inspected by the worker prior to use for signs of damage, and must be found to be in good working order.

The following equipment may be signed out from the Tool Crib:
