

process will include an Ongoing Improvement Program  
be considered as part of the program's next cyclical

The purpose of this report is to provide an updated  
implementation plan following

## Progress Update on the Implementation Plan

Recommendation#1

Progress

## Progress

*What specific actions have been taken?*

A major review of Environmental Science course listings was undertaken over the summer of 2022. This involved the removal of a number of redundant or less relevant courses, removal of courses that have not been offered for many years, and the addition of some newly-offered courses.

The Environmental Science Course List is now divided into three themes: Environmental Life Sciences, Environmental Physical Sciences, and Environment and Society. This grouping helps students to identify and choose courses that fulfil their particular interests.

## Next Steps (if applicable)

## Progress

*What specific actions have been taken?*

A major step towards the inclusion of Indigenous Content involves the introduction of a new course that is cross-listed as Indigenous Studies (S4023, Geography 8001, and Earth Science 8023Y). This course is co-instructed by Clint Jacobs of the Walpole Island First Nation.
